🎯 Objective

Detail-oriented and creative Full Stack Web Developer with a passion for building responsive, user-centric web applications from front to back. Skilled in modern frameworks like React and Node.js, with hands-on experience in both SQL and NoSQL databases. Seeking to contribute to innovative development teams by delivering high-quality, scalable solutions that improve user experience and drive business growth.

📁 Experience

- OICT Solution** March, 2025 - July, 25
Full stack web developer
Developed a web-based House Rental Management System, featuring property listings, tenant management, and booking functionalities using modern front-end and back-end technologies.

Designed and implemented a user-friendly E-commerce website, showcasing responsive design, secure checkout, and dynamic product management capabilities.

Created an Online Quiz Platform tailored for tech-related subjects such as Software Engineering, Computer Science, Information Technology (IT), and Information Systems (IS), with features including real-time scoring, question randomization, and user authentication.

🎓 Education

- Haramaya** 2026
Bachelor's degree in Software Engineering.
3.5

🔧 Projects

- E-commerce website**
Designed and implemented a user-friendly E-commerce website, showcasing responsive design, secure checkout, and dynamic product management capabilities.
- Online Quiz Platform**
Created an Online Quiz Platform tailored for tech-related subjects such as Software Engineering, Computer Science, Information Technology (IT), and Information Systems (IS), with features including real-time scoring, question randomization, and user authentication.
